Claim 29 is generic to a plurality of disclosed patentably distinct species (and their use) comprising: compounds of structure: B4-T4-M; B2-T2-M; B8-T8M; and B4-T4-M which encompass conjugate compounds which are independent and/or patentably distinct due to differences in their chemical structure, physico- , bio- chemical properties , that are capable of separate manufacture and/or use; and additionally the searches of each of the Markush structures and compounds contained therein would result in separate and individual burdensome manual and computer structure and bibliographic searches.

- B. a single compound within the elected Markush generic selected in A. above.

Applicant is advised that a complete reply to this requirement must include an identification of the species that is elected and a listing of all claims readable thereon. Applicant is entitled to consideration of claims to a reasonable number of disclosed species in addition to the elected species provided all the claims to each additional species are written in dependent form or otherwise include all the limitation of an
